

AI Governance & Safety Training

Build robust governance frameworks, manage AI risks, and deploy responsible AI with confidence.

Program Overview

This comprehensive program equips organizations with the frameworks, tools, and best practices required to implement effective AI Governance and Responsible AI systems. Designed for leadership, compliance teams, and AI practitioners, the training focuses on operationalizing governance, mitigating emerging risks, and enabling safe deployment of AI systems.

Learning Outcomes

- Understand global AI regulations and compliance requirements
- Design enterprise-grade AI governance frameworks
- Assess and mitigate AI risks across lifecycle stages
- Implement Responsible AI principles in real-world workflows
- Enable transparent, ethical, and accountable AI operations

Who Should Attend

- C-suite leaders and senior executives
- AI/ML teams and technical leaders
- Governance, legal, and compliance professionals
- Risk, audit, and policy teams

Training Format

- Duration: 1–2 days (customizable)
- Delivery: Virtual / On-site / Hybrid
- Includes: Case studies, templates, hands-on exercises, and governance toolkits
